UNIVERSITY CALENDAR.

COLLEGE OF PHILOSOPHY, LETTERS AND SCIENCE.

1895.

May 10,	Friday,	Senior Examinations close.
June 7,	Friday,	Final Examinations close.
June 9,	Sunday,	Baccalaureate Sermon, 11:00 A. M.
June 9,	Sunday,	Sermon before Y. M. C. A., 8:00 P. M.
June 10,	Monday,	Annual Oration before the Alumni Association, 8:00 P. M.
June 11,	Tuesday,	Meeting of the Board of Curators, 9:00 A. M.
June 11,	Tuesday,	Class Day, 10:00 A. M.
June 11,	Tuesday,	Meeting of the Alumni Association, Field Day.
June 11,	Tuesday,	Final Celebration of the Literary Societies, 8:00 P. M.
June 12,	Wednesday,	Commencement Exercises, 10:00 A. M.
September 11,	Wednesday,	Beginning of the Session, 1894–1895.

1896.

January 2,	Thursday,	Beginning of Second Term.
February 22,	Saturday,	Intermediate Celebration of the Literary Societies.
February 27,	Thursday,	Day of Prayer for Colleges.
March 23,	Monday,	Beginning of Third Term.

COLLEGE OF MEDICINE AND COLLEGE OF DENTISTRY.

1895.

June 19,	Wednesday,	Commencement Exercises.
October 7,	Monday,	Beginning of Fall Session (Polyclinic and Laboratory course).

1896.

January 2,	Thursday,	Beginning of Regular Session.
June 18,	Thursday,	Close of Session.

ACTION OF THE BOARD OF CURATORS

Defining the scope and purpose of the University, and the relation existing between the Officers and Members of the Faculty of the Institution.

In the Memorial of the Educational Convention held at Lexington, May 7 and 8, 1872, and which inaugurated the movement that resulted in the establishment of our University, the following language occurs: "It is the sense of this convention that steps be taken to at once establish, on a broad and liberal basis, an institution of the highest order, under the auspices of the Synod of Kentucky, and thus carry out the earnest wishes of the fathers, as demonstrated by the establishment of Centre College now lost to this Church."

In Article 7th of the Charter as adopted and approved March 3, 1873, by the General Assembly of Kentucky, is the following: "It shall be the duty of the Board of Curators, as soon as may conveniently be done, to establish an institution to be known as the *Central University*, and to provide for the establishment therein of a department for instruction in Literature and the Arts and Sciences, on the model of the best universities; and, as soon as it may be done with advantage, a department of Law and a department of Medicine. It shall also afford every facility for the establishment by the Synod of Kentucky of a department of Theology, either of itself or in conjunction with any of its Co-Synods, or its General Assembly.

These statements from the original movers and founders of the institution make it clear that what they aimed at was a University in the proper sense of the term—that is a school embracing the four faculties after the best models.

It is evident that they did not expect to establish at once all the departments, but "as soon as may be done with advantage." It was then expected to be a matter of growth. During the first decade of the institution only two of the faculties were established, viz.: that of the College of Philosophy, Letters and Science, and that of the College of Medicine. Recently the College of Dentistry was established. It is the sense of this Board that the original purpose should be adhered to, and that as soon as practicable a school of Theology should be established, an eager desire for which has existed in the minds of many of the friends and patrons of the University for years past.

In the College of Philosophy, Letters and Science, the University model was evidently contemplated.

Section 2 of Article 5 of the Charter defines the powers of the Board

of Curators therein: "In said Board of Curators shall be vested the power to fix and direct the course of instruction in said University; to employ and contract with teachers and professors; to determine what chairs of schools in the University shall be established, and how the same shall be controlled and conducted; and, in general, to control and manage the affairs of said University."

In Article 5, Section 4, of the Charter, the Chancellor is constituted the agent of the Board, and he acts by their authority. In Article 4, Section 4, he is declared to be "the chief Executive Officer of the University, charged with the general superintendence of its affairs, both financial and educational, subject, however, to the general instructions of the Board of Curators in matters under their control;" and, as the power of the Board is over the power of every department of the University, the power of the Chancellor as the chief Executive Officer, during such times as the Board is not in session, is supreme, subject always to the review or control of the Board. In the exercise of the duties of his office as the agent of the Board, he shall collect and invest the funds of the University, meeting all the liabilities incurred in the maintenance of the institution. He shall have the care of the buildings and grounds; he shall seek patronage for the institution and commend it abroad; and he shall confer with the Faculty on all matters of general interest, co-operating with them and seeking the highest degree of efficiency in every department. To this end he shall have free access to the meetings of the Faculty and to the lecture-rooms of all professors and teachers, but in such a manner as to conserve the independence of the instructors and cultivate cordial relations between himself and them and the Board, and thus develop unity of life, aim and purpose in all who are officially related to the institution.

The President of the Faculty of the College of Philosophy, Letters and Science presides over and conducts the deliberations of the Faculty and sees that their decisions are enforced. He is also Vice-Chancellor of the University, and discharges the duties of the Chancellor in his absence, or in his inability to act, or during any vacancy in the office.

To the Faculty is committed the government and discipline of that department of the institution in which they are instructors, and all the details of business that usually pertain to it in institutions of learning modeled after the University pattern. Each member is independent in his own department, but is bound by the rulings of the Faculty in all matters that pertain to the general management of the institution.

Adopted at the Annual Meeting at Richmond, June 12, 1888.

GOVERNMENT OF THE UNIVERSITY.

DEGREES.

COLLEGE OF PHILOSOPHY, LETTERS AND SCIENCE.

SESSIONS OF 1893-94.

BACHELOR OF SCIENCE.

S. H. Carothers.

BACHELORS OF ARTS.

C. O. Groves, Mt. Sterling, Ky.
T. L. Haman, Vaiden, Miss.
C. L. Nourse, Hopkinsvillle, Ky.
E. J. Baird, Kentucky.
S. S. Gunlack, Lexington, Mo.
A. McKibben, Augusta, Ky.
J. A. Williams, Paris, Ky.
J. W. Scudder, Kentucky.
H. H. Sweets, Magna cum laude, Elizabethtown, Ky.

BACHELORS OF LETTERS.

Miss Elizabeth G. Barbour, Richmond, Ky.
J. H. Shackelford, Richmond, Ky.
E. C. Blanford, Lebanon, Ky.
M. C. Marion, Jackson, Ky.
Miss S. Russell Letcher, Magna cum laude, Richmond, Ky.

HONORARY DEGREES.

DOCTORS OF DIVINITY.

Rev. Benjamin Lewis Hobson . . . . . Chicago, Ill.
Rev. Jonathan Sprowle Lyons . . . . . Louisville, Ky.
Rev. Isaac Stuart McElroy . . . . . Lexington, Ky.

COMMENCEMENT, JUNE, 1894.

BACCALAUREATE SERMON.

Rev. W. Logan Nourse . . . . . Hopkinsville, Ky.

SERMON BEFORE THE Y. M. C. A.

Rev. W. K. Patterson . . . . . Elizabethtown, Ky.

DEPARTMENT DIPLOMAS.

Charles Daly, English, Physiology, History, Political Economy.

A. L. George, Philosophy, Physiology, Bible, Christian Evidences, Modern Languages.

W. M. Gibson, Physiology.

J. H. Hendren, Mathematics, Astronomy, Chemistry, Geology, Physiology.

Miss Julia Higgins, Physiology.

W. W. Kenney, Philosophy, Bible, Physiology, Physics.

R. E. Lair, Philosophy, Physiology, Political Economy, History, Botany, Zoology.

J. B. Russell, English, Bible, Philosophy, Physiology, History, Political Economy.

Miss Estill Walker, Mathematics, Astronomy, Latin, Physiology, Bible, Physics.

Miss Martha O. Walker, Latin, Greek, Physiology, Bible.

Miss Florence Witherspoon, Mathematics, Astronomy, English, Latin, Physiology.

MEDICAL GRADUATES—1894.

Bray, Thomas F. . . . . Michigan.
Brayshaw, Milton M. . . . . Illinois.
Breathwit, William . . . . . Arkansas.
Brown, Charles Newton . . . . . West Virginia.
Bryan, Eugene H. . . . . Kentucky.
Cronkrite, James Byron . . . . . Michigan.
Doolittle, Samuel Wade . . . . . Wisconsin.
Ellis, James Mc. . . . . Missouri.
Gordon, Charles Chester . . . . . Illinois.
Grant, Hugh McKee, A. M. . . . . Kentucky.
King, Albert E., M. D. . . . . Iowa.
Lapsley, Frank Lee, A. B. . . . . Kentucky.
Lincoln, Charles Stuart Fessenden, A. B. . . . . Maine.
Long, Louis Hoskins . . . . . Kentucky.
Lueders, Alfred William . . . . . Wisconsin.
Lyon, John Bird . . . . . Kentucky.
McClure, Joseph B. . . . . Arkansas.
McDaniel, Edward . . . . . Missouri.
McDowell, James D. . . . . Indiana.
Norman, Joseph B. . . . . Missouri.
Nunn, James Campbell . . . . . Missouri.
Pennington, William D., M. D. . . . . Kentucky.
Petrie, Socrates, A. M. . . . . Texas.
Pipes, M. Lee . . . . . Kentucky.
Pittman, Henry Middleton . . . . . Kentucky.
Rice, George Mendenhall . . . . . Kentucky.
Showers, Le Roy, M. D. . . . . Alabama.
Spivey, William Alexander, M. D. . . . . Mississippi.
Thixton, Claude Adrian . . . . . Kentucky.
Thompson, William Girard . . . . . Mississippi.
Weld, William Homer, M. D. . . . . Wisconsin.
White, Charles William . . . . . Kentucky.

HONORS FOR 1894.

FIRST HONOR.

HOSPITAL APPOINTMENT—Dr. Frank Lee Lapsley, of Kentucky.

SECOND HONOR.

CURATOR'S MEDAL—Dr. William Breathwit, of Arkansas.

THIRD HONOR.

FACULTY MEDAL—Dr. Henry Middleton Pittman, of Kentucky.

FOURTH HONOR.

APPOINTMENT OF RESIDENT PHYSICIAN TO OUT DOOR DEPARTMENT—Dr. J. Campbell Nunn, of Missouri.

MEDALS.

GOTTLIEB MEYER PRIZE—$25 for the best notes of Professor Larrabee's Lectures on Diseases of Children—Dr. Frank Lee Lapsley, of Kentucky.

COOK PRIZE—Gold Medal for the best volume of Clinical Notes on Diseases of the Eye, Ear and Throat—Dr. William Breathwit, of Arkansas.

H. J. TILFORD PRIZE—$50 in Gold for the best examination in Theory and Practice of Medicine—Dr. William Breathwit, of Arkansas.

HONORABLE MENTION—Dr. William G. Thompson, of Mississippi.

GOLD MEDAL—For best Notes on Clinical Medicine—Dr. Claude Thixton, of Kentucky, and W. H. Graham, of Louisiana.

H. H. GRANT MEDAL—For best examination on Surgery—Dr. J. Campbell Nunn, of Missouri.

H. H. GRANT MEDAL—For Clinical Assistance—S. S. Campbell, of Virginia.

PROFESSOR MCMURTRY'S PRIZE—Gold Medal for the most complete and perfect report on his Clinical Lectures on Diseases of Women—Dr. William G. Thompson, of Mississippi, and Dr. Eugene H. Bryan, of Kentucky.

DR. P. RICHARD TAYLOR GOLD MEDAL—Junior Medical—William K. Turner, of Kentucky.

J. E. HAYS MEDAL—For best standing in Anatomy — William K. Turner, of Kentucky.

DR. WILLIAM R. BLUE PRIZE—For best work in Microscopical Laboratory—S. W. Howe, of Florida.

JUNIOR PRIZE—Scholarship—William K. Turner.

FRESHMAN PRIZE—SCHOLARSHIP—D. G. Humphreys, of Florida.

COLLEGE OF DENTISTRY.

HONORS FOR 1894.

FACULTY GOLD MEDAL—Dr. Leon Grauman, of Kentucky.

FRAZEE MEDAL — OPERATIVE WORK — Dr. F. B. Speer, of Pennsylvania.

FRAZEE MEDAL— PROSTHETIC WORK—Dr. V. B. Coleman, of Kentucky.

SMITH GOLD MEDAL.—PROSTHETIC WORK—B. S. Shinness, of Indiana, class of 1896.

JUNIOR PRIZE SCHOLARSHIP—P. B. Lesemann, of Illinois, class of 1895.

FRESHMAN PRIZE SCHOLARSHIP — Searcey Marlowe, A. B., of Alabama, class of 1896.

ROLL OF HONOR.

DISTINGUISHED GRADUATES.

WILLIAM EDWARD GRANT . . . . . KENTUCKY.
LEON GRAUMAN . . . . . KENTUCKY.
RUSSELL MARKWELL . . . . . KENTUCKY.

DENTAL MATRICULATES, SESSION OF 1894.

SENIOR CLASS.

Speer, F. B.	Pennsylvania	J. R. King, D. D. S.

PRIZES AWARDED.

COLLEGE OF PHILOSOPHY, LETTERS AND SCIENCE.

SESSION OF 1892-3.

The W. R. Letcher Prize for the best special examination in the Calculus and its applications, S. H. Carothers.

The William M. Irvine Prize in Chemistry, L. W. Doolan.

The James B. McCreary Prize for the best essay for *The Atlantis*, J. H. Hendren.

The Curator's Prize for the best final examination on Sophomore Latin, Miss Estill Walker, R. B. Benton.

The A. Wilkes Smith Prize for the best set of notes on the Course of Lectures in Physiology, J. H. Chandler, Jr.

The best Speaker's Medal (offered by the Chancellor), W. M. Jackson.

The D. C. Collins Prize for the highest average mark on all his studies, L. W. Doolan.

The Richard Hawes Prize (offered by Rev. Dr. D. O. Daviess) for the highest average in the department of Greek, L. W. Doolan.

The Literary Societies' Declaimer's Prize, H. O. Cecil.

The O. A. Kennedy Prize in Sophomore Chemistry, G. A. Bisset.

HONOR ROLL FOR 1893-4.

COLLEGE OF PHILOSOPHY, LETTERS AND SCIENCE.

EXPLANATIONS: 1st grade, 95-100, "Distinguished," in caps; 2d Grade, 90-94, "Proficient," in small letters.

College of Philosophy, Letters and Science.

DEPARTMENTS.

The course of study in the College of Philosophy, Letters and Science is divided into fourteen departments, as follows:

I. Latin.
II. Greek.
III. Mathematics.
IV. Physics and Astronomy.
V. English Language and Literature.
VI. Modern Languages.
VII. Philosophy.
VIII. History and Political Science.
IX. Chemistry.
X. Geology.
XI. Physiology.
XII. Commercial Science.
XIII. The Bible and Christian Evidences.
XIV. Military Science and Tactics.

The selection of studies is, in all cases, subject to the approval of the Faculty.

All students expecting to take a degree are required to select one of the three prescribed courses, and no subsequent changes can be made except by special permission of the Faculty.

CURRICULUM OF STUDY.

NOTE.—The numbers indicate the hours per week.

FRESHMAN YEAR.

Students who can not become candidates for degrees will be permitted to take such studies as they desire and are prepared for, provided they have the required number of hours per week.

CERTIFICATES.

As evidence of distinguished attainments in any department, in any class except the Senior, a certificate of distinction will be conferred, the certificate to be without the seal of the University.

DEPARTMENT DIPLOMAS.

A diploma will be given to students who satisfactorily complete the course in any of the departments.

DEGREES.

Bachelor's Degrees.

I. The Degree of Bachelor of Arts will be conferred upon students who complete the prescribed B. A. Course.

II. The Degree of Bachelor of Science will be conferred upon students who complete the prescribed B. S. Course.

III. The degree of Bachelor of Letters will be conferred upon students who complete the prescribed B. L. Course.

Diplomas of students averaging 95 or over in the Junior and Senior years are inscribed *summa cum laude;* 90 or over, *magna cum laude.*

Master's Degrees.

IV. The Degree of Master of Arts will be conferred upon Bachelors of Arts who shall have completed one year of graduate study, or the equivalent of sixteen hours per week during the session, in the departments of Latin, Greek and Philosophy, and shall have written a satisfactory thesis upon some subject belonging to one of these departments.

V. The Degree of Master of Science will be conferred upon Bachelors of Science who shall have completed one year of graduate study, or the equivalent of sixteen hours per week during the session, in the departments of Natural Science, Mathematics and Philosophy, and shall have written a satisfactory thesis upon some subject belonging to one of these departments.

VI. The Degree of Master of Letters will be conferred

upon Bachelors of Letters who shall have completed one year of graduate study, or the equivalent of sixteen hours per week during the session, in the departments of English, Modern Languages and Philosophy, and shall have written a satisfactory thesis upon some subject belonging to one of these departments.

To be eligible to the Master's Degree, a student must have attained an average mark of 85 upon the studies included in the Bachelor's Degree.

The above scheme of degrees contemplates residence at the University. In the case of non-resident students, two years will be necessary.

All examinations, whether of resident or non-resident students, will be held at the University.

DEPARTMENT OF PHILOSOPHY.

PROF. LOGAN.

In the first term of the Junior year an elementary course is given, preparatory to the study of Logic, Psychology and Ethics.

Text-book: McCosh's Psychology.

The second term of the Junior year is devoted to the study of Logic; the first quarter being occupied with the problems, principles and rules of the Deductive Logic; the second quarter with the principles and processes of the Scientific Method or Inductive Logic.

Text-books: McCosh's Manual and Fowler's Elements of Inductive Logic.

Books of Reference: Hamilton, Mansel, Thompson, Mill, Jevons and Ueberweg.

In the Senior year, the first term is given to the study of Evidences of Christianity.

Text-book: Butler's Analogy.

The second term is given to the study of Ethics.

Text-book: Gregory's Christian Ethics. These are required for the purpose of elucidating and bringing under distinct formulæ the leading principles of science.

Psychology is taught as an inductive science. Facts furnish the material and the tests of doctrine. The student is taught to try the validity of theory by appeal to his personal consciousness.

The different powers and processes of knowledge are distinguished by their objects, their relations, their laws and their products; and the trustworthiness of the various processes and products of the mind's cognitive activities is explained. Especial prominence is given to the Intuitions, and much pains is taken to explain and enforce the logical and ethical importance of a sound Metaphysic.

Text-book: Porter's Elements of Intellectual Science.

Reference: McCosh's Intuitions.

M. A. Course.

In this department a graduate course is offered, embracing, for the present, History of Philosophy, Metaphysics, Theism and Ethics.

Both Ancient and Modern Philosophy will be discussed, the major part of attention being given to the Modern. The text-book is Ueberweg's History of Philosophy.

The course in Metaphysics investigates those conceptions and propositions which the mind assumes as the fundamental relations of existence, the conditions of knowledge and *a priori* principles of experience.

Text-books: McCosh's Intuitions and Lotze's Outlines of Metaphysics.

The course of Theism discusses the questions of the existence of a Personal God, as the Creator, the Natural Governor and Moral Ruler of the Universe; the problems of Divine order in nature and in human life.

Text-book: Flint's Theism.

DEPARTMENT OF THE BIBLE.

PROF. LOGAN.

The studies of this department are distributed to the four classes. The first term of the Freshman year is

occupied with studies upon the Origin, Authorship, Preservation, Character and Divine Authority of the books of the Bible.

Text-book: Our Sixty-six Sacred Books, by Dr. Edwin Rice.

The second term of the Sophomore year is given to the study of the Bible History, with the purpose of aiding the student to get a comprehensive view of the Bible narrative, and an understanding of the lessons which the history is designed to convey.

Text-book: Blaikie's Manual of Bible History.

In the first term of the Junior year is given a course of study in Christian Evidences.

Text-book: Fisher's Manual of Christian Evidences.

The Senior Class during the first term is occupied with a general survey of the History of the Canon of the New Testament.

Text-book: Westcott on the Canon.

DEPARTMENT OF THE GREEK LANGUAGE AND LITERATURE.

PROF. BADEN, INSTRUCTOR DOOLAN.

For admission into the First Year Class the applicant must have an accurate knowledge of the inflections and the elementary principles of Syntax, and must be able to translate into idiomatic English the first two books of Xenophon's Anabasis or an equivalent.

White's Beginner's Greek Book and Goodwin's Greek Grammar and Anabasis are recommended for preparation.

Pronunciation by accent is insisted upon.

In the First and Second years the grammatical side of the language is emphasized, very close attention being given to forms, idioms, syntax and prosody.

In the Third year the work is more advanced and scientific, and original essays on various points of history, literature, style and syntax are required of each member.

In connection with Prose Composition, which continues through the entire course, considerable attention is paid to translating at dictation from Greek into English and English into Greek.

Students are trained to read at sight passages selected from a wide range of authors. By this practice a ready facility in handling the language is acquired.

Private reading of parallel authors, under the guidance of the instructor, is encouraged.

There will be lectures at stated times on Ancient Manuscripts and Art of Writing, Philosophy, Rhetoric, Laws, Religion and Social Customs of the Greeks.

The aim throughout the course is to give the student a clear, connected idea of the entire field of classic Greek and its relation to modern thought and literature.

The following course may be modified to suit the needs of the class:

First Year.—Xenophon, Anabasis or Hellenica; Attic Orators, Andocides, De Mysteriis; Lysias and Isocrates, Select Orations; Studies in Greek Rhetoric and History of the Period.

Second Year.—Attic Orators (continued); Demosthenes, De Corona or Philippics and Olynthiacs; Plato, Apology and Crito, Protagoras and Phaedo; Homer, Iliad; Sight Reading of the Odyssey; Dialectic Peculiarities of Form and Syntax; Classical Geography and Mythology; Lectures on Greek Philosophy and Epic Poetry.

Third Year.—Euripides, Alcestis and Hippolytus; Sophocles, Antigone and Œdipus Tyrannus; Æschylus, Prometheus Bound and The Seven against Thebes; Aristophanes, Clouds; Lyric Poets, Selections; Thucydides and Herodotus; General Review of Greek History; Lectures on Greek Tragedy and Comedy, Lyric Poets and Lyric Metres; special attention to the scansion of the Greek Chorus.

DEPARTMENT OF THE LATIN LANGUAGE AND LITERATURE.

PROF. BADEN, INSTRUCTOR DOOLAN.

For admission into the First Year Class the student must have an accurate knowledge of the inflections and the general principles of Syntax, and must be able to translate into idiomatic English, Cæsar, Gallic War, Books I-IV; Cicero, Four Orations against Catiline or an equivalent.

The candidate must pronounce by *quantity*.

The method of instruction is similar to that indicated in the School of Greek.

FIRST YEAR.—Cicero, Select Orations and Letters; Sallust; Ovid; Virgil; History of the Period and Mythology; Syntax and Metre.

SECOND YEAR.—Livy and Tacitus; Seneca; Horace and Juvenal; History of Rome; Classical Geography; Lectures on Roman Satire and Lyric Metres.

THIRD YEAR.—Plautus and Terence; Lucretius or Cicero's Philosophical Works; Catullus, Tibullus and Propertius; careful study of Early and Familiar Latin; much time given to the practical application of the various metres; Lectures on Roman Philosophy and Elegiac Poetry.

M. A. Course.

In both Greek and Latin the candidate must pursue an extensive course of reading under the personal direction of the instructor, and present an approved thesis on some line of original investigation. Residence at the University for one year is required.

DEPARTMENT OF CHEMISTRY.

PROF. PARKS.

SOPHOMORE YEAR.—Second and third terms. Two lectures a week on Elementary Chemistry, supplemented by recitations and laboratory work.

The work in the laboratory is regarded as a very important feature of this as of all other courses in chemistry.

The students perform for themselves a series of experiments bearing on the subjects of the lectures.

Text-book: Remsen's Introduction to the Study of Chemistry (Briefer Course).

JUNIOR YEAR.—Two lectures and one recitation a week on Inorganic Chemistry, in continuation of the course of the previous year.

Laboratory work four hours weekly, illustrating the more important points of the lectures. Qualitative analysis will be commenced in this course.

SENIOR YEAR.—Organic Chemistry three times weekly through the year.

Laboratory work eight hours weekly, in the preparation of carbon compounds.

Text-book: Remsen's Organic Chemistry.

During the second term advanced Inorganic Chemistry will be considered, with laboratory work in inorganic preparations and qualitative analysis, while during the third term the subject will be Theoretical Chemistry, with laboratory work in quantitative analysis.

Text-books: Remsen's Inorganic Chemistry and Remsen's Theoretical Chemistry.

Reference Books: Roscoe and Schorlemmer's Treatise on Chemistry, Richter's Chemistry (Inorganic and Organic), Fresenius' Qualitative and Quantitative Analysis, Lothar Meyer's Modern Theories of Chemistry, Mendelejeff's Principles of Chemistry.

DEPARTMENT OF GEOLOGY.

PROF. PARKS.

The preparation for the study of Geology begins in the Freshman year with Physical Geography, followed by Botany, Zoology, Chemistry and Mineralogy.

These are required before beginning Geology.

FRESHMAN YEAR.—First term, Physical Geography, three times weekly.

Second and third terms, Botany.

SOPHOMORE YEAR.—Zoology and Chemistry.

JUNIOR YEAR.—Mineralogy twice a week through the year. The course will begin with Crystallography. Drawing of crystal forms from a new set of crystal models recently imported for this department will be the laboratory work. Descriptive Mineralogy with blow-pipe analysis.

SENIOR YEAR.—Geology five times weekly, the first term.

DEPARTMENT OF PHYSIOLOGY.

DR. SMITH.

The studies of this department embrace a course of lectures on general Physiology.

The minute structures of the tissues of the body, together with the laws which govern them, will be fully considered. The course will be illustrated by diagrams, preparations and experiments.

Text-book: Dalton's Physiology and Hygiene, or Martin's Human Body.

Books of Reference: Foster's Physiology; Carpenter's Physiology; Huxley's Biology.

Apparatus.

A full set of the Bock-Steger Anatomical and Physiological Models of the Human Body is now in use. New apparatus of the most improved form is being added from time to time. Arrangements have been made to provide a well-equipped dissecting-room for the purpose of carrying out experimentally the subject-matter of the course. Dissections will be made to illustrate the field of comparative anatomy and physiology. Practical work of the microscope will be included. The department will thus be rendered a valuable preparatory school for those students who propose making the study of medicine their profession.

DEPARTMENT OF HISTORY AND POLITICAL SCIENCE.

PROF. AVERY.

The studies of this department embrace Historical, Economic and Political subjects.

The aim is to provide a course of general History, with a careful examination of the political and constitutional history of the United States.

In Political Science there will be given a general view of the principles and laws of Political Economy, or the science of wealth, and an exposition of the principles of Civics with especial references to the functions and duties of American citizenship.

History.

FRESHMAN CLASS.—Sheldon's Greek and Roman History.

JUNIOR CLASS.—Myers' Mediæval and Modern History; Morris' Class-Book History of England.

SENIOR CLASS.—Green's Shorter History of the English People; Johnston's History of American Politics.

DEPARTMENT OF PURE MATHEMATICS.

PROF. CROOKS.

FRESHMAN.—Students desiring to enter the Freshman Class must have gone through the subject of Quadratic Equations in Wells' University Algebra or some other text-books of equal grade.

The whole of the Freshman year will be spent in the study of Geometry.

Text-books: Byerly's revised edition of Chauvenet's Geometry; Smith's Introductory Modern Geometry.

SOPHOMORE.—Wells' Trigonometry; Selected topics in Advanced Algebra (Wells' College Algebra); Hardy's Analytic Geometry.

JUNIOR.—Hardy's Analytic Geometry; Smith's Elements of Co-ordinate Geometry; Taylor's Calculus; Byerly's Calculus.

DEPARTMENT OF PHYSICS AND ASTRONOMY.

PROF. BARBOUR.

Gage's Elementary work will be used as hitherto for an outline, to be filled up from more advanced treatises.

The large hand dynamo, imported to our order, has been received, and several new pieces of excellent galvanic apparatus have been procured.

Candidates for M. S. Degree will assist in the preparation of experiments, and read Schellen's Spectrum Analysis and advanced courses in the works of Ganot, Deschanel and Tyndall.

Astronomy.

SENIOR.—Young's Astronomy and the American Ephemeris and Nautical Almanac throughout the year.

Reference Books: Newcomb's and Holden's Astronomy, Langley's New Astronomy.

Latitude of Richmond, 37° 44′ 39.6″, N.

Longitude, 84° 17′ 51.6″, W.; taken by United States Geodetic Survey.

To illustrate Astronomy we have procured a considerable number of Magic Lantern slides of the first quality and finest finish.

Candidates for M. S. Degree will take an advanced course in Calculus or Astronomy.

Reference Books: The above mentioned, with Newcomb's Popular Astronomy and Clarke's History of Astronomy. Also, practical work with the Telescope.

CIVIL ENGINEERING.

An elegant *Engineer's Transit* with *Solar Attachment*, made by W. & L. E. Gurley, of Troy, N. Y., has been added to the outfit.

Students in the Junior and the Senior Classes are admitted into this department.

Subjects: Theory and Practice of Leveling for Streets, Turnpikes and Railroads; Grade Lines; Calculation of Ex-

cavations and Embankments ; Profile Drawing ; Setting out Slope-stakes ; Running Circular and Parabolic Curves ; Maps of Surveys.

Text-book : Davies' Surveying, supplemented by practical directions.

DEPARTMENT OF THE ENGLISH LANGUAGE AND LITERATURE.

PROF. AKERS.

FIRST YEAR.—The object of this course is to give students thorough instruction and drill in English Grammar, and to lay the foundation for advanced work in Rhetoric and in English Literature. The grammatical work presupposes a common school acquaintance with Grammar, and preparation for it depends far more upon the character of the instruction that has been had than upon the ground gone over.

Text-books : Whitney's Essentials of English ; Clark's Briefer Practical Rhetoric ; Gayley's Classic Myths in English Literature.

SECOND YEAR.—The object of this course is to ground students in the outlines of the History of English Literature and to give them such acquaintance with a few masterpieces as will develop a literary taste. Some grammatical work is done in the early part of the course.

Text-books : Gilmore's Art of Expression ; Pancoast's Introduction to English Literature ; Style's From Milton to Tennyson ; Morris' Class-book History of England.

THIRD YEAR.—The object of this course is to introduce students to the Historical study of English and to the Science of Language.

Text-books : Cook's First Book in Old English ; Sweet's Second Primer of Middle English ; Whitney's Language and the Study of Language ; Lounsbury's English Language.

Candidates for B. A. omit Sweet's Primer and Lounsbury's.

PRACTICAL RHETORIC AND COMPOSITION.

PROF. BARBOUR.

Genung's Practical Rhetoric will be used as a text-book, accompanied by copious criticisms on the great prose and poetical English authors, and references to the Classical and the Modern German writers.

DEPARTMENT OF MODERN LANGUAGES.

PROFS. AKERS AND AVERY.

French.

FIRST YEAR.—Whitney's Practical French; Rollin's French Reader. Exercises daily.

SECOND YEAR. — Grammar and exercises continued; Reading of Plays and Stories.

German.

FIRST YEAR. — Joynes-Meissner German Grammar; Joynes' German Reader.

SECOND YEAR.—Schiller's Jungfrau von Orleans; Lessing's Minna von Barnhelm, and Goethe's Faust, with references to Whitney or Joynes.

DEPARTMENT OF COMMERCIAL SCIENCE.

PROF. ROBERTS.

The course in Bookkeeping includes practical exercises in Single and Double Entry, applied to all kinds of transactions. Besides the simple practice, the student is made familiar with all business forms, such as Notes, Checks, Drafts, Way-bills, etc.

Text-book: Rochester's University Bookkeeping.

Text-book: Clark's Commercial Law.

MILITARY DEPARTMENT.

CAPT. HENRY WYGANT, U. S. A.

This Department is in charge of the Professor of Military Science and Tactics, an officer of the regular army, detailed by the War Department for the purpose.

Instruction is both practical and theoretical. The student on entering college is drilled in the school of the soldier, including bayonet exercise, and is advanced, successively, to the schools of the company and battalion. Recitations in drill, regulations, guard duty, small arms firing regulations, will be held, and lectures on military subjects will be given.

The practical part of this department is required of the two lower classes only.

The benefits of the drill are apparent in the improved carriage and deportment of the student body.

MILITARY DEPARTMENT OF CENTRAL UNIVERSITY.

Captain HENRY WYGANT, U. S. A., Commandant.
Major, S. S. GUNLACK.
Adjutant, FIRST LIEUTENANT R. W. SEPHENSON.
Sergeant-Major, T. H. PICKELS.
Chief Musician, SERGEANT WM. PARK.
Sergeant in charge of recruits, J. S. HAGINS.

COMPANY A.

Captain H. L. COCKERHAM.
First Lieutenant T. ALLIN. Second Lieutenant J. C. STONE.

Preparatory Department.

The studies of this department are intended to meet the wants of two classes of students: Those who desire to prepare for college and those who may desire, by a year or two of special study, to fit themselves for teaching or business.

A handsome new building for the use of the department has been erected. It contains a large study hall seated with single desks, convenient recitation rooms and all the necessary equipments of a first-class training school.

Professor R. E. L. Pullian, M. A., principal, and two assistants who have had successful experience as teachers will give their undivided attention to the thorough discipline and instruction of all pupils entering the department.

FIRST YEAR.

Exercises in reading and writing will form the leading feature of the work in English for the first year.

The selections for reading will be of a character suited to form a taste for good literature.

English.—Harvey's Elementary Grammar and Composition.

Mathematics. — Stoddard's Intellectual Arithmetic; Robinson's Rudiments of Arithmetic.

Geography.—Monteith's Manual of Geography.

Reading.—McGuffey's Readers; Hans Andersen's Fairy Tales.

Spelling.—McGuffey's Speller.

The diacritical marks specially noticed.

Special pains taken to drill pupils in reading, writing, spelling and English composition. The same method pursued throughout the whole Preparatory Course.

SECOND YEAR.

ENGLISH.—Harvey's Elementary Grammar and Composition; Harvey's Practical Grammar and Composition.

MATHEMATICS. — Stoddard's Intellectual Arithmetic; White's Intermediate Arithmetic.

GEOGRAPHY.—Maury's Manual, Revised.

HISTORY.—Montgomery's Leading Facts of American History.

LATIN.—Scudder's Latin Reader. Special attention given to Latin Composition.

THIRD YEAR.

ENGLISH.—Elements of Composition and Grammar, Southworth & Goddard.

MATHEMATICS. — Stoddard's Intellectual Arithmetic; White's Higher Arithmetic; Robinson's Elementary Algebra.

HISTORY.—Montgomery's Leading Facts of English History.

LATIN.—Scudder's Latin Reader completed; Collar's Gate to Cæsar; Lives of Cornelius Nepos; Bennett's Latin Grammar.

GREEK.—White's Beginner's Greek Book; Goodwin's Greek Grammar. Special attention given to Greek Composition.

FOURTH YEAR.

ENGLISH.—Welsh's Lessons in English Grammar.

LATIN.—Cæsar de Bello Gallico, Books I., II., III. and IV.; Cicero's Orations against Catiline; Bennett's Latin Grammar; Exercises in Latin Composition.

GREEK.—Goodwin's Greek Grammar; Kelsey's Xenophon's Anabasis, two books; Greek Prose Composition.

MATHEMATICS. — Wentworth & Hill's High School Arithmetic; Dubb's Arithmetical Problems; Wentworth's Complete Algebra through Quadratic Equations.

HISTORY.—Barnes' General History.

Students not taking Latin and Greek will be permitted to

take an additional course in History, English and Mathematics. They will also have the opportunity of studying Bookkeeping. All students required to have a complement of studies.

PHYSICAL TRAINING.

Careful attention will be given to the physical training of the students in this department. They have access to the Gymnasium, and will be required to go through daily drills under the directions of an instructor.

MILITARY DRILL.

Military drill has been adopted in this department, the object of which is to improve the health and physique of students, and to give that elementary military knowledge which every citizen should possess that he may render intelligent and effective aid to his country or State in case of war or riots.

Uniform.

A uniform consisting of cap, jacket and trousers of gray cloth will be used. The entire suit is neat and serviceable, and while required at drills may be used on any occasion.

TRAINING IN ORATORY.

Throughout the year the students in this department will be carefully trained in the art of public speaking. As a stimulus to careful work a gold medal is offered to the best declaimer in each of the three higher grades, as determined by a contest held at the end of each session.

The prize for the session of 1893–4 was awarded as follows: The Senior prize in oratory, to J. F. Swallow.

Origin and Plan of the University.

The Southern Synod of Kentucky purposing to establish an institution of learning of high order, to perpetuate the design of the fathers in the establishment of Centre College, which had been lost to the Synod, it was judged by the friends of liberal education and of the Presbyterian Church in Kentucky, within and without the church, a favorable opportunity for securing in the State a University on a broad and Christian basis. A number of the Alumni of Centre College and of friends of learning and of the church therefore assembled in convention at Lexington on the 7th of May, 1872, and having organized themselves into a permanent association, on the following day tendered to the Synod their co-operation for establishing such an institution. The offer was accepted by the Synod, and a joint committee was established by the two bodies for arranging details and prosecuting an endowment. A charter was agreed upon by the committee and adopted by the Synod and the Association. The sum of two hundred and twenty thousand dollars was subscribed, which, though regarded as but a beginning, was judged sufficient to justify opening an institution. By the charter the donors of the endowment own and control the University, under the title of

THE CENTRAL UNIVERSITY OF KENTUCKY,

And they elect their successors from among the Alumni of the institution and its liberal benefactors. The government of the University and the management of its funds are confided to the Chancellor and fifteen Curators, two-thirds of whom must be members of the Alumni Association. The institution, thus placed under the joint auspices of the Synod and Association, avoids, it is believed, the dangers which arise from exclusive State or Church control.

LOCATION.

The College of Philosophy, Letters and Science is located at Richmond, a city of five thousand inhabitants, in the midst of the most beautiful rolling and fertile portion of the bluegrass region of Kentucky, near the foothills of the Cumberland mountains, at an elevation of five hundred feet above the Ohio river.

In point of healthfulness, this locality is unsurpassed by any in the country. It is absolutely free from malaria, which complicates nearly every disease. In winter the climate is of that invigorating, bracing character best adapted to secure the greatest mental and physical activity, while in summer the elevation insures cool nights, so indispensable to comfort and rest.

Richmond is situated on the main stem of the Kentucky Central railroad from Cincinnati to Knoxville, and is in direct communication with the Louisville & Nashville railroad at Richmond Junction, and with the Cincinnati Southern railroad at Nicholasville. Passengers leaving Nashville, Chattanooga and Knoxville arrive at Richmond in the afternoon of the same day. The Louisville Southern railroad has been completed to Richmond. The city is thus an important railroad center and is in easy and rapid communication with all parts of the country.

The University grounds adjoin the town and are nearly a square, one fourth of a mile to the side.

The buildings are equal in convenience to those of any college in the country, and command a view of the fertile region for many miles around and of the mountains nearly or quite to the Tennessee and Virginia lines.

The people of Richmond, constituting as hospitable and refined a community as any country can claim, open their houses to students, and thus throw around them the restraints of the family circle and the influences of the Christian household.

ADMISSION.

Candidates for admission into any class are, as a rule, required to pass an examination on the studies previously pursued by the class or their equivalents. But students from high schools of recognized good standing, if certified to have completed a course of study which can be fairly accepted as equivalent, and to have passed satisfactory examinations on the same, will be received on trial into the Freshman Class without examination if they desire it. This privilege has been granted to the following:

Alleghany Academy, near Lexington; Prof. A. N. Gordon, M. A., Principal.

Shelbyville High School; Profs. Sampson and Scearce, Principals.

Hogsett's Academy, Danville.

Rugby High School, Louisville; Prof. Bain, M. A., Principal.

Almond's University School, Louisville; Prof. M. B. Almond, M. A., Principal.

Training School for Boys, Louisville; Prof. H. K. Taylor, M. A., Principal.

Waddell's High School, Louisville; Prof. H. B. Waddell, M. A., Principal.

Cynthiana High School; Prof. C. A. Leonard, M. A., Principal.

Henry County High School, New Castle, Ky.; Professor B. F. Hill, Principal.

Henry Academy, Versailles; Prof. Wm. Henry, Principal.

Jordan's High School, Pine Bluff, Ark.; Professor J. Jordan, M. A., Principal.

Versailles High School, Prof. Threlkeld, Principal.

Wentworth Military Academy, Lexington, Mo.; Prof. S. Sellers, M. A., Principal.

Presbyterian High School, Campbellsville, Ky.

The same privilege will be granted to other similar institutions.

Candidates for admission must report to the Chancellor and to the President of the Faculty within twenty-four hours after their arrival.

A certificate of good moral character will be demanded of every applicant; and if from another institution of learning, a certificate of honorable dismissal.

Conditioned students will be required to make up their deficiencies within some prescribed time.

It is very important that every student be in his place on the first day of the term, and that his attendance be uninterrupted to the close.

EXAMINATIONS.

There are three general examinations of all the classes every year.

The examinations are in writing and thorough. The final grade is determined from the record of recitations and the marks of examination papers. The student is thus encouraged to daily preparation for the class-room, and also to the permanent acquisition of definite knowledge.

DISCIPLINE.

The government of the Faculty gives judicious scope to the development of true manhood. The largest freedom of self-guidance is allowed that the instincts of the gentleman demand, but no conduct will be allowed that abuses this freedom. Students on matriculation obligate themselves to observe the regulations adopted by the Faculty for the government of the institution. No student is allowed to leave the town during the session without the permission of the Faculty, or to withdraw from the University until regularly dismissed.

No literary society may be established without the advice of the Faculty. No student, while in attendance on any department, shall be a member of any secret society or college fraternity unless organized by consent of the Faculty.

Billiards and card-playing are prohibited.

PROHIBITION OF CREDIT.

The Legislature has passed a special act for the benefit of Central University, which prohibits merchants and others, under severe penalties, from crediting students.

CIRCULAR LETTERS.

At the end of every term a circular letter is addressed to the parent or guardian of each student, in which are stated his average standing in scholarship, absences from recitation and chapel, together with any improper conduct requiring particular notice.

RELIGIOUS.

All students in the College of Philosophy, Letters and Science are required to attend daily morning prayers in the chapel, and public divine service in some one of the churches each Sabbath morning. Parents are requested to communicate to the Faculty what church they desire their sons to attend; otherwise the Faculty will direct.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

This society is in successful operation. The object of the Association is to bring new students under moral and religious influences, and furnish opportunity for Christian effort in the University.

The Association is addressed from time to time, during the session, by eminent ministers and others.

A room has been set aside for the sole use of the Association, which the ladies of Richmond have kindly furnished. This room is used for regular weekly devotional meetings, and is supplied with a good selection of periodical and other literature. Donations of books and periodicals will be gratefully received.

To meet the increasing needs of the Association liberal friends are planning to erect at an early date a large building which will be fully equipped and dedicated to the work of the Association.

LITERARY SOCIETIES.

Spacious halls in the University building have been assigned to the two literary societies, the "Epiphyllidian" and the "Philalethean." The debates and other literary exer-

cises of these societies are valuable auxiliaries in a course of mental discipline and social culture. They have a nucleus of a library, and will be grateful for any contribution to their shelves from the friends of learning. Public exercises are held on the 22d of February, and the final celebration occurs on Tuesday before the Commencement, when orations are delivered by three representatives of each society selected from the Junior class.

LITERARY MAGAZINE.

The students of the University publish a monthly magazine, the *Atlantis*, which furnishes a vehicle for literary and journalistic work.

ALUMNI ASSOCIATION.

The Alumni Association, composed of a number of the Alumni of Centre College, in sympathy with the Southern Synod of Kentucky and other friends of learning, was organized May 7, 1872. By the charter they elect their own successors from the donors to the endowment fund, and from the Alumni of the University. The annual meeting will be held on Tuesday, June 12th, at 4 o'clock P. M.

Officers: Hon. J. Q. Ward, President; Rev. J. V. Logan, D. D., Secretary.

SPECIAL ENDOWMENTS.

The Walters Professorship of Applied Mathematics.

The late S. P. Walters, of Richmond, gave, during his life, the sum of $26,000 toward the endowment of the Chair of Mathematics. Mrs. Annie W. W. Walters, knowing the intention of her husband with reference to the University, generously added $4,000 to this amount, thus completing the endowment of this important chair.

The McBrayer Professorship of the Bible and Christian Evidences.

Endowed by the late Hon. W. H. McBrayer, of Lawrenceburg, $30,000.

The Ford Professorship of English and Modern Languages.

Mr. Orville Ford subscribed $20,000 for the endowment of this chair, and other liberal friends added the sum of $10,000.

The Collins Professorship of Chemistry and Geology.

The Hon. D. C. Collins, of Covington, gave $10,000, which with $2,000 previously given the University has been set aside as the beginning of the endowment of the Chair of Chemistry and Geology.

The Alexander Professorship of Philosophy.

Mr. A. J. Alexander, of Woodburn, Ky., subscribed $10,000, which, with his former subscription of $1,500, was set aside as the beginning of the endowment of the Chair of Philosophy.

The Mary R. Kinkead Memorial—$10,000.

Endowed by Mrs. Mary R. Kinkead, of Versailles, Ky.

The McClintock Memorial—$5,000.

Endowed by Mrs. John McClintock, of Millersburg, Ky.

LECTURESHIPS.

A subscription of $5,000 endows a Lectureship after the manner of the famous Boyle, or Bampton, or Hulsean lectures of England.

Miss Mary J. Lyons, of Danville, Ky., is the first to avail herself of this opportunity by contributing $5,000 for endowment of

The Lyons Lectureship.

The interest on this sum may be used from time to time, at the discretion of the Chancellor, for meeting the expense of courses of lectures on some branch of Christian Evidences.

ACTION OF THE SYNOD.

Attention is called to the action of the Synod at Paducah, Ky., in October last, in adopting the report of the Committee to visit the University.

REPORT OF THE COMMITTEE ON SYNOD APPOINTED TO VISIT CENTRAL UNIVERSITY.

The committee appointed at the last meeting of Synod to visit Central University respectfully submits the following report for the consideration and approval of Synod:

The chairman of the committee removed from the bounds of the Synod soon after his appointment. The duties of the chairmanship have therefore devolved upon the undersigned. Two efforts were made to get the committee together at Richmond, but neither of them was successful. The acting chairman, however, visited the University a few days ago, attended the recitations of the students, and gained all the information possible in regard to the University from the Chancellor, the professors, the students and the residents of the city, all of whom readily and satisfactorily answered the questions asked them about the University, and some of whom volunteered information of great value to the committee.

The work done by the professors is of a high order and deserves the unqualified commendation of the Synod. Resident alumni stated that, in their judgment, the teaching force of the University is superior to any it has ever had, which is praise, indeed, as those know who are familiar with the history of the University. But there is one thing which makes it impossible for these excellent teachers to do all for their students that they are capable and desirous of doing. It is the inadequate preparation for the University given by the schools of the State to their pupils, especially in the Latin and Greek languages. They are taken over the ground required for entering the University, but they are not taught the principles of the construction of these languages as thoroughly as they should be. The result is that the time of the professor is, to some extent, consumed in teaching his first year students what they should have been taught before they came to the University. This, however, is not due altogether to inferior instruction in the preparatory schools; it is caused, in part, by the high standard of scholarship which obtains in the University, and which reveals the weak points in a student's preparation.

Your committee made a special effort to get information in regard

to the moral life of the students. Severals residents of the city were interviewed about the matter, and their unanimous testimony was, that the students of Central University are as moral a body of young men as can be found in any of our denominational institutions, in all of which there is known to be only a modicum of immorality.

The present session has opened well, and both professors and students have entered upon their work with vigor and enthusiasm. There is, however, a danger threatening the future attendance on the University, of which the Synod should be made aware, and which it should, without delay, take steps to avert. It has its source in the free tuition which may be had at several large institutions in the State. Your committee does not presume to make any recommendation as to the best method of averting the danger. It simply calls the attention of Synod to it, believing that it will devise a wise and effective mode of preserving, in all its vigor, an institution which has done so much for the cause of higher education in Kentucky.

It was not possible for your committee to visit the College of Medicine, the College of Dentistry and the High Schools of the University, but it learns from trustworthy sources that they are all in a flourishing condition.

It is recommended that the following committee be appointed to visit the University and make a report thereon to the next meeting of Synod: Rev. J. S. Lyons, D. D., Rev. J. G. Anderson, Rev. Carr Moore, Rev. W. Y. Davis, Rev. S. L. Grigsby, Rev. M. B. Porter and Elders Dr. B. W. Stone, Dr. S. B. Caldwell.

W. H. NEEL, *Chairman.*

Further action of the Synod:

Resolved, It is the conviction of the Synod of Kentucky that Central University should be kept in line with the advancing thought in educational enterprises in Kentucky, and to this end the Board of Curators may, at such time as they may think is prudent, in order to the further endowment or equipment of the institution, present it to the Christian liberality of our people.

In accordance with the above resolution a new plan for increasing the endowment has been organized. The Chancellor has met with much encouragement. The new plan has been started by a single subscription of $10,000.

SCHOLARSHIPS.

A subscription of $1,000 endows a scholarship, which entitles the subscriber during life to maintain in the College of Arts, a son, or some poor worthy young man, without charge of tuition fee.

There are scores of our citizens who could easily subscribe a scholarship, thus aiding in the endowment of the University, and at the same time secure the benefit of education to their own sons or those who are not able to pay for it.

PRIZES TO BE AWARDED AT THE CLOSE OF THE SESSION OF 1895-96.

First—The James B. McCreary Prize: A Gold Medal to the student who writes the best essay for the *Atlantis* during the year; the award to be made by a committee of three.

Second—The Curator's Prize: A Gold Medal to the student who makes the highest average in the Department of Latin.

Third—The A. Wilkes Smith Prize: A Gold Medal for the best set of notes on the course of lectures in Physiology.

Fourth—The Best Speaker's Medal: Offered by the Chancellor to the junior representative of the Literary societies, who, on the Commencement anniversary, delivers the best original speech.

Fifth—The D. C. Collins Prize: A Gold Medal to the student who makes the highest average mark on all his studies.

Sixth—The Richard Hawes Prize: A Gold Medal offered by Rev. Dr. D. O. Davies to the student who makes the highest average in the Department of Greek.

PROSPECTS OF THE UNIVERSITY.

The increase of students from year to year, the satisfactory arrangement of the old business, the hearty and unanimous indorsement of the Synod, the liberal response of friends to the call for a new endowment, the energetic action of many prominent members of the Alumni Association, and the general feeling of hopefulness prevailing throughout the State, all warrant the expectation that Central University will take front rank among the best institutions of the land.

NEW CURRICULUM OF STUDY.

The recent additions to the endowment of the University have enabled the Board of Curators greatly to enlarge the courses of study. While providing all the advantages of a fixed curriculum, students are enabled to select, within limits directed by the Faculty, such studies as will be most advantageous to their development. Students are able, in this way, to pursue certain branches to a fuller extent than has heretofore been possible.

THE LIBRARY—DR. LANDIS' GREAT GIFT.

A few years ago the University came into possession of a very valuable collection of nearly three thousand volumes, the library of the late Rev. R. W. Landis, D. D., of Danville, and bequeathed by him to this institution.

It is largely, but not wholly, composed of works on theology, and is regarded as the most valuable private collection of standard writers of the Reformed or Calvinistic stamp in this country.

In consideration of this valuable gift, and in deference to Dr. Landis' cherished wishes, the University has published his celebrated work on "Imputations and Original Sin."

The University would take this opportunity of expressing its indebtedness to its numerous friends for their kindly donations; in particular to Hon. John G. Carlisle, Hon. J. C. S. Blackburn, Hon. W. C. P. Breckinridge and Hon. James B. McCreary for public documents. Donations to the Library Fund and gifts of books and pamphlets, engravings and Indian relics are earnestly solicited from the Alumni and other friends.

DEPARTMENT OF PHYSICAL CULTURE AND ATHLETICS.

All exercises in the Gymnasium will be under the supervision of the Physical Director.

The athletics of the University are carried on under the supervision of an efficient instructor, acting as representative of the Faculty, to control all the athletic work of the students. The contests are thus held subject to the discipline of the Faculty, the aim being to hold the members of the different teams strictly responsible, thereby preventing those excesses which occasionally arise from the imprudence or thoughtlessness of the young men.

Thus far the work has been organized under these heads: Football, baseball and track athletics, tennis, and the exercises of the Gymnasium.

The College has lately greatly improved its athletic grounds, constructing a fine field for football and baseball, and a quarter-mile cinder track. Besides these there is a new, light, airy, tasteful Gymnasium, thoroughly equipped with the best modern appliances, dressing-rooms, bath-rooms, etc., and uses a thorough system of physical culture. Before entering the Gymnasium each student must be examined by the Medical Director, and if it is found that the regular class exercises are not likely to be healthful for him, the director will prescribe other exercises suited to his constitution and condition. Plans are on foot for the erection of one of the largest and best equipped Gymnasiums in connection with any of the Southern colleges.

MEMORIAL HALL.

In October, 1883, the Centennial of Presbyterianism in Kentucky was celebrated by the Synod at Harrodsburg. Presbyterianism and higher education have been so identified throughout the whole history of the State that there could have been no appropriate celebration of this anniversary in which the cause of education was not made prominent.

In order to leave a permanent memorial of this interesting epoch, the ladies of the Southern Presbyterian church undertook to raise $15,000 for the erection of a dormitory and boarding hall on the grounds of the University. Their design, which was to cheapen the cost of education, and thus place it within the reach of a large number of students, has been fully realized. The building, a handsome three-story brick, a model of convenience and comfort, furnishing accommodations for more than fifty young men, was completed and occupied on the 18th of September, 1883. The total cost, including furniture, was about $20,000.

Under the admirable management of the Matron, young men are surrounded by all the influences of a refined, Christian home.

Disorderly students will not be allowed to remain as permanent boarders.

The Matron of Memorial Hall for the session of 1895–6 will be Mrs. M. L. Lynn.

EXPENSES.

The cost of board in Memorial Hall (including furnished room, servant's attendance, table fare, fuel and light) will be $120 for the session of forty weeks, payable quarterly in advance. The rooms are large and well ventilated, and no room will have more than two occupants.

All damage done to a room, beyond the ordinary wear and tear, must be made good as soon as possible at the expense of the occupants. This provision includes all breakage of glass, whether by accident or design.

Students desiring to board in Memorial Hall will do well to make early application.

Students also board with the best families in the town or adjacent country at from $2.50 to $4 per week. This is inclusive of everything except washing, which is had at from $1 to $1.50 per month.

Tuition in College department, per session of forty weeks, payable in advance $50 00
Tuition in Preparatory department, per session of forty weeks, payable in advance 40 00
Matriculation fee in College for the year, payable in advance . 10 00
Matriculation fee in Preparatory for the year, payable in advance 5 00
Students in the departments of Physics and Chemistry pay a laboratory fee of 10 00

Total expenses for the year, including tuition, board and washing, need not exceed $160 to $220 in the Preparatory department, and $180 to $240 in the College, exclusive of books.

Candidates for the gospel ministry and the sons of all ministers are received without charge for tuition.

The incidental and laboratory fees are required of all students.

The College fees are due at the beginning of the session and must be settled promptly.

No student will receive a diploma, or an honorable dismission, until his fees are paid.

COURSES OF STUDY.

PRIMARY COURSE.

Reading—First, Second and Third Readers.
Writing.
Spelling—Oral and Written.
Arithmetic—The Fundamental Rules.
Language Lessons.

INTERMEDIATE COURSE.

Reading—Fourth Reader.
Spelling and Defining.
Penmanship.
Arithmetic—Written and Mental.
Composition—Tarbell, Part I.
Elementary Geography—Eclectic.
Primary Grammar—Harvey.

TEACHERS' NORMAL COURSE.

Elocution—Brown's Elocution.
Penmanship—Spencerian System.
Orthography—Penniman.
Arithmetic—Ray's Practical.
Geography—Niles' Advanced.
English Grammar—Harvey.
Composition—Hart's Rhetoric.
Physiology—Brown.
U. S. History—Barnes.
Kentucky History—Smith.
Civil Government—Peterman.
Theory and Practice—White.

COMMERCIAL COURSE.

Bookkeeping—The New Bryant & Stratton's High School Bookkeeping.

Commercial Arithmetic—Wentworth's High School Arithmetic.

Business Penmanship—Spencerian System.

Spelling of Difficult Common Words—Penniman.

Business Forms and Correspondence—Bryant & Stratton's High School Bookkeeping and Hart's Rhetoric.

Commercial Geography—Last Division of Niles' Advanced Geography.

HIGH SCHOOL COURSE.

ENGLISH.

First Year.—Harvey's English Grammar and Analysis.

Second Year.—Hart's Rhetoric, Welsh's Lessons in Higher English.

Third Year.—Welsh's Essentials in English, Clark's Practical Rhetoric.

Fourth Year.—Bain's Composition, Grammar, Meiklejohn's Literature.

MATHEMATICS.

First Year.—Wentworth's High School Arithmetic.

Second Year.—Wentworth's Elementary Algebra; Wentworth's Complete Algebra begun.

Third Year.—Wentworth's Complete Algebra completed; five books of Davies' Legendre (Van Amringe).

Fourth Year.—Davies' Legendre completed; Plane and Spherical Trigonometry; Davies' Revised Surveying.

LATIN.

First Year.—Bingham's Latin Grammar and Reader.

Second Year.—Bingham's Grammar; four books of Cæsar's Gallic War.

Third Year.—Sallust's Conspiracy of Cataline; two books of Virgil's Æneid; Collar's Practical Latin Compositions; Pennell's Ancient Rome; Exercises in Sight Reading.

Fourth Year.—Three Orations of Cicero; Cato de Senectute; Gildersleeve's Latin Grammar; Collar's Practical Latin Composition; Exercises in Sight Reading.

GREEK.

First Year.—White's Beginner's Greek Book.

Second Year.—Goodwin's Grammar; Kelsey's Xenophon's Anabasis, two books.

Third Year.—Kelsey's Anabasis; Lysias; Monatt's Hellenica; Boise's Exercises in Greek Syntax; Goodwin's Grammar.

GERMAN.

Elective with Latin or Greek.

First Year.—Otis' Elementary German; Brandt's German Reader.

Second Year.—Brandt's German Grammar; Lodeman's Exercises; Schiller's Wilhelm Tell; Goethe's Egmont; Lessing's Minna von Barnhelm; Heine's Harzreise.

HISTORY.

First Year.—Barnes' General History; Thalheimer's History of England.

Second Year.—Freeman's History of Germany; Barnes' History of France.

NATURAL SCIENCE.

First Year.—Natural Philosophy (Steele).

Second Year.—Mineralogy (Dana).

Third Year.—Astronomy (Young).

MUSIC.

This department is under the charge of Miss Mariah E. Miller, who teaches both Organ and Piano. To those who are taking other studies only two lessons per week will be given, with one hour of practice on instrument per day; but any one taking less than full work in other departments may take a correspondingly greater amount of music.

PRIZES.

The following prizes are offered:

1. A Gold Medal to the student who shows himself the best debater at the celebration of Washington's birthday.

2. A Gold Medal to the young lady who makes the best recitation at the celebration of Washington's birthday—The J. K. Lemon Prize.

3. A Gold Medal to the student who delivers the best oration on Commencement day—The W. N. Haldeman Prize.

4. A Gold Medal to the student who writes the best essay to be read on Commencement day—The Chancellor's Prize.

5. A Gold Medal to the student who attains to the highest general average in the Primary Department—The W. T. Grant Prize.

6. A Gold Medal to the student who attains to the highest general average in the Intermediate Department—The E. L. Samuel Prize.

7. A Gold Medal to the student who attains to the highest general average in the Teacher's Normal Course.

8. A Gold Medal to the student who attains to the highest general average in the Collegiate Course—The B. H. Young Prize.

9. A Gold Medal to the student who stands highest the first year in Latin.

10. A Gold Medal to the student who stands highest the second year in Greek—The W. B. Cooper Prize.

11. A Gold Medal to the student who stands highest in the Bible Course—The J. H. Moore Prize.

12. A Gold Medal to the one who stands highest on examination in Common School Branches—The John C. Day Prize.

Physical Training.

Careful attention will be given to the Physical Training of all students.

For young men and boys, besides the military drill, base-ball, football and gymnastics are encouraged; the object being to improve the health and physique of the students, and thus enable them to do better work at their studies. For the young ladies daily exercises in calisthenics are held.

BIBLE LECTURE COURSE.

Instead of weekly recitations on the Bible, the plan is adopted of daily lectures to the whole body of students, given by Dr. Mickel at the chapel exercises. These lectures will be of about ten minutes length, and will take up successively many of the topics of Biblical Geography, History and Biography, and of Christian Evidences and Ethics.

The students will take notes of these lectures, and a gold medal is offered by Col. J. H. Moore, of Winchester, to the one who makes the best syllabus or set of notes upon this course.

MILITARY DEPARTMENT.

H. D. M'CLINTOCK, MAJOR-COMMANDING.

For young gentlemen and boys, military drill is adopted, the object of which is to improve the health and physique of students, and to give that elementary military knowledge which every citizen should possess that he may render intelligent and effective aid to his country or State in case of war or riots.

During the past year this department has been put upon a firm basis, and will in future be made a permanent part of the work of the institute.

Capt. Henry Wygant, of the Twenty-fourth Regiment of the regular army of the United States, detailed by the Secretary of War as Military Instructor at Central University, visits once a month the Jackson Collegiate Institute.

The uniform consists of dark blue military cap, coat and trousers. Only the cap is required, at a cost of 90 cents, but as the suit is neat and serviceable, and is cheap at its cost of only $10, that will also be required after April 1, 1895.

Many have already bought full suits, and they may be obtained by students, at any time, by making an order through Prof. C. A. Logan.

DIPLOMAS AND CERTIFICATES.

Students upon completion of the entire course of study in the Collegiate Course are entitled to diplomas from Central University as graduates of Jackson Collegiate Institute. Students upon completion of any other course are entitled to certificates.

READING COURSE.

Among the prominent features of the institution is the splendid Library and Reading-room. The library consists of one thousand and five hundred volumes, to which all pupils have daily access for reading and reference. Each pupil, above the Primary Grade, is required to read from two to four volumes per term—standard works recommended by the professor of English—on which he is questioned at the final examination of the term. The reading-room contains the leading daily and weekly papers of the State, and a number of the best magazines, and is open to pupils at all hours of the day.

LITERARY SOCIETIES.

There are two Literary Societies in connection with the institute, the Periclean and the Ciceronian, and all students above the Intermediate Department will be assigned to one of these on entrance. The societies are presided over by one of the professors, and in them the young men are taught the art of public speaking in a practical manner, by debate and other oratorical exercises, and the young ladies present recitations and essays and give musical entertainments. Washington's birthday is observed by these societies.

SESSIONS AND RECESSES.

There will be a session of forty weeks, which will be divided into four terms of ten weeks each. There will be a recess of one week, including the holidays of Christmas and New Year's day. Thanksgiving day and 22d of February will be observed as national holidays.

LOCATION.

Jackson, the county seat of Breathitt, is beautifully situated on high ground near the north fork of the Kentucky river, and is noted, not only as a central point in the mountains, but also for the healthfulness of its climate, the inexpensiveness of living, and the sobriety and refinement of its people. Not only has Jackson good churches and Sabbath schools, it is also a prohibition town, and all laws are strictly enforced. It has rapid and easy communication with other places by means of the Kentucky Union railroad now running to this point, which brings the morning papers of Louisville and Cincinnati the same day. The climate of the Kentucky mountains is exceptionally good; the nights are cool in summer, and in winter the hills afford protection from the cold winds. All things considered, there is no place in the State where the student can be more comfortable and do better work.

The Jackson Collegiate Institute will give the courses of study best suited to the needs of the students in actual attendance, and as the demand for higher education increases the curriculum will be enlarged until, at no distant day, as is confidently expected, the institute shall become a college which will meet all the demands of higher education for the people of Eastern Kentucky.

BOARDING.

The Little Hall, named in honor of Mr. and Mrs. C. J. Little, with large and well lighted rooms for the students, was erected during the summer of 1892, and has been filled with students during its first year. Under the admirable

management of Miss Mary P. Irvine, the inmates are surrounded by all the influences of a refined Christian home. One of the professors will always reside in the Hall. Disorderly students will not be allowed to remain as permanent boarders. Good board, with furnished rooms, is given at $2.50 per week. Besides this, board can be obtained in private families at from $2 to $2.50 per week.

EXPENSES.

All fees are payable at the beginning of each term of thirteen weeks to the Treasurer, Prof. M. C. Marion, who then gives a card of entrance for that term.

Families make their own contracts for payment of board.

Matriculation Fee, paid on entrance, for the year	$10 00
Tuition per term of 13 weeks	5 00
Tuition per term of 13 weeks, intermediate department	4 00
Tuition per term of 13 weeks, primary department	3 00
Music per term of 13 weeks	12 00
Art	12 50
Shorthand, complete course	25 00
Typewriting, complete course	5 00
Use of Machine, complete course	3 00
Uniform and Cap	11 00
Board per week, about	2 25
Washing per week, about	25

Course of Study.

PRIMARY DEPARTMENT.

Spelling (oral and written), Reading, Arithmetic, Language Lessons, Recitation of Short Selections.

INTERMEDIATE DEPARTMENT.

Spelling, Analysis and Definitions; Reading (including selections from the best authors); Arithmetic (written and mental); English Grammar, Composition, Geography, United States History, History of Kentucky, Penmanship, Exercises in Elocution.

All pupils are required to recite in spelling and reading every day.

HIGH SCHOOL DEPARTMENT.

Four Years' Course.

ENGLISH.

First Year.—Hyde's Studies in English.

Second Year.—Reed's and Kellogg's Higher Lessons in English.

Third Year.—Welsh's Lessons in English Grammar and Clark's Practical Rhetoric.

Fourth Year.—Bain's Composition Grammar, Meiklejohn's English Language, Parts III. and IV.

MATHEMATICS.

First Year.—Robinson's Higher Arithmetic.

Second Year.—Wentworth's Elementary Algebra; Wentworth's Complete Algebra begun.

Third Year.—Wentworth's Complete Algebra completed; five books of Wentworth's Geometry.

Fourth Year.—Geometry completed; Plane and Spherical Trigonometry; Davies' Revised Surveying.

LATIN.

First Year.—Bingham's Latin Grammar and Reader.

Second Year. — Bingham's Grammar; four books of Cæsar's Gallic War.

Third Year.—Sallust's Conspiracy of Cataline; two books of Virgil's Æneid; Collar's Practical Latin Composition; Pennell's Ancient Rome; Exercises in Sight Reading.

Fourth Year.—Three Orations of Cicero; Cicero de Senectute; Gildersleeve's Latin Grammar; Collar's Practical Latin Composition; Exercises in Sight Reading.

GREEK.

First Year.—Harkness' First Greek Book; White's Beginner's Greek Book.

Second Year.—Kelsey's Anabasis; Lysias; Monatt's Hellenica; Boise's Exercises in Greek Syntax; Goodwin's Grammar.

Third Year.—Dyer's Plato's Apology and Crito; D'Ooge's Demosthenes on the Crown; Allen's Medea of Euripides; Greek Prose Composition.

HISTORY.

First Year.—Barnes' General History; United States History.

Second Year.—Allen's History of Rome.

Third Year.—Smith's History of Greece.

Fourth Year.—Myer's and Allen's Outlines of Ancient History.

GERMAN.

(ELECTIVE WITH LATIN OR GREEK.)

First Year. — Dreyspring's Cumulative Method; Worman's Deutsch Echo.

Second Year. — Worman's German Grammar; Collegiate German Reader.

PHYSICS.

Gage's Elements of Physics.

CHEMISTRY.

Remsen's Elements; Laboratory Practice.

FRENCH.

First Year.—Edgren's French Grammar; Otto's French Reader.

Second Year.—Whitney's Practical Grammar; Classic French Plays.

TEACHER'S NORMAL COURSE.

Practical Arithmetic, English Grammar and Composition, Geography, Physiology, History of Kentucky, United States History, Elocution, Penmanship, Orthography, Theory and Practice of Teaching.

MORAL SCIENCE AND LITERATURE.

Lectures by Prof. Patterson.

PRIZES.

1. THE HELM PRIZE (founded in memory of Gov. John L. Helm) for best scholarship in all studies.

2. THE BEN HARDIN HELM PRIZE (founded in honor of Gen. Ben Hardin Helm) for the best scholarship in Latin.

3. THE HEWITT PRIZE (founded by Gen. Fayette Hewitt) for best scholarship in Greek.

4. THE CHANCELLOR'S PRIZE for best scholarship in Mathematics.

5. HEAD MASTER'S PRIZE for Penmanship.

6. FACULTY MEDAL for best Declamation.

LOCATION.

The Charter of the Central University of Kentucky provides for the establishment of six preparatory schools under the auspices of the University. The Board of Curators, having accepted the liberal offer of the citizens of Elizabethtown and Hardin county, has located the second one of these University schools in Elizabethtown. The design is to furnish to the people of Hardin and surrounding counties a training school second to none in the country—one that will give the best mental and moral training and prepare its pupils for practical business life, or higher classes of college or university.

With this view the curriculum of study has been carefully prepared to meet the wants of the two classes of students, those who wish to complete their education in the high schools and those who desire to prepare themselves for a university course.

Grounds have been secured and elegant buildings with all the necessary equipments of a first-class training-school have been erected. Session begins September 6, 1894.

Experienced and skillful teachers, having the best interest of the pupil at heart, have been employed, and nothing will be spared to establish as good a school as can be found anywhere.

The location of the school is most fortunate. Elizabethtown is a town of 3,000 inhabitants, on the main line of the L. & N. R. R., at the junction of the C., O. & S. W. R. R., forty miles from Louisville, and accessible to all parts of the State. Trains are passing at all hours of the day.

In point of healthfulness, Elizabethtown is unsurpassed by any town in the country.

The people are hospitable and refined, and have opened their houses to students and thus thrown around them the restraints of the family circle and the influence of the Christian household.

The site selected for the building is on the west side of

the town and embraces seven acres, which makes a beautiful campus.

TUITION.

Tuition in Primary and Intermediate Departments per term of 10 weeks, payable in advance, quarterly $10 00
Tuition in High School and Teachers' Normal Course per term of 10 weeks, payable in advance, quarterly 12 50
No extras.

BOARDING.

Students will board in the best families of the town or adjoining country at from $2.50 to $3.50 per week. This includes everything except washing, which can be had at $1.00 to $1.25 per month.

L. H. BLANTON, *Chancellor*,
RICHMOND, KY.

COLLEGE OF MEDICINE

AT LOUISVILLE.

Regular Session Begins Wednesday, January 2d, and Ends June 20, 1895.

The Curators take pleasure in calling attention to the high position attained by the Hospital College of Medicine among the leading medical colleges of the country. They believe experience has abundantly proved that polyclinical and laboratory instructions yield the best results, and hence have adopted this as their method, rather than the old forms of didactic lectures alone.

Believing that the sentiment throughout the country demands higher qualifications of graduates in medicine, this college adopted, in 1890, a regulation requiring of all students entering after the session of 1891 to attend three complete courses of lectures before applying for graduation. It was the first medical college in the South to change from two courses to three, and it is believed that the profession throughout the whole South will indorse its efforts to raise the standard of medical education, and will support it in its action. Experience has abundantly shown the wisdom of the change, the Freshmen showing a much more rapid advancement in their studies than under the old system, when the student, with little or no time for study, was obliged to spend the most of his time in the lecture and clinic rooms.

COLLEGE BUILDINGS AND EQUIPMENT.

In 1874, when the Medical Department of the Central University began its career, the buildings which had been provided were thought to be more convenient and com-

fortable in arrangement than any similar structure in the South. When the Dental Department of the University was established, in 1886, new buildings were erected and more elaborate arrangements were made for laboratory and clinical instruction.

Advancement in the methods of teaching has been such, however, as to induce the Curators of the University to provide still further for its Medical and Dental Departments. A new building has been erected and was formally opened January 2, 1894. This building is constructed with especial regard to the convenience and comfort of students, and is one of the most ample and complete, in its arrangement and equipment, in this country, and its various compartments are more numerous, commodious and convenient than those of any other Medical College in the Southwest. The building is a handsome four-story brick and stone structure, well lighted and ventilated, with two commodious lecture rooms, laboratories and dissecting rooms, and an admirable surgical theater with all the essential conveniences and requirements for conducting extensive surgical and gynecological clinics. Special facilities are also provided for accommodating and utilizing the large medical clinic of the College, as well as the special clinics in children's diseases, diseases of the eye, ear and throat, venereal and skin diseases, and other clinical work. Eight rooms are set apart for the reception and separation of patients. In a word, this College will afford its students all the advantages of the most advanced methods of instruction, which can only be done with the aid of commodious laboratories and clinical facilities; at the same time providing for the comfort and health of students in a building constructed in accordance with modern sanitary laws.

The conspicuous success of these two departments has, in the judgment of the Curators, fully warranted this additional expense in erecting the most commodious edifice devoted to medical teaching in the South.

The equipment of the College enables the Faculty to demonstrate, with the aid of microscopes, maps, charts,

magic-lantern views, PHYSIOLOGY, CHEMISTRY, MICROSCOPY, TOXICOLOGY, HISTOLOGY and PATHOLOGY. Other demonstrations, in Operative and Minor Surgery, Anatomy, Histology and Pathology, Urinology, Physical Diagnosis, the use of the Ophthalmoscope and Laryngoscope, Sounds, Specula, Catheters and Instruments of precision in the diagnosis and treatment of disease.

CLINICAL INSTRUCTION.

In addition to the necessary didactic lectures, the Polyclinical course consists of:

1. MEDICAL CLINIC, by Prof. Thos. Hunt Stucky. Embracing General Systematic Diseases. From 8 to 10 A. M., on Wednesdays and Saturdays.

2. SURGICAL CLINIC, by Prof. H. Horace Grant. Embracing Fractures, Dislocations, Tumors, Venereal Diseases, etc. From 11 A. M. to 12:30 P. M., on Mondays and Thursdays.

3. DISEASES OF THE CHEST, by Prof. Frank C. Wilson. From 11 A. M. to 12:30 P. M., on Tuesdays and Fridays.

4. DISEASES OF INFANCY AND CHILDHOOD, by Prof. John A. Larrabee. From 3 to 4 P. M., on Wednesdays and Saturdays.

5. DISEASES OF THE EYE, EAR AND THROAT, by Prof. Dudley S. Reynolds. From 3 to 4 P. M., on Mondays and Thursdays.

6. DISEASES OF WOMEN, by Prof. Lewis S. McMurtry. From 4 to 5 P. M., on Mondays and Thursdays.

7. DISEASES OF THE SKIN, by Prof. John E. Hays. From 2 to 3 P. M. on Saturdays.

More than twenty thousand cases have been registered at the Hospital College polyclinic during the past year.

At no other institution can superior advantages be had for the study of diseases incident to the South and West.

Students should select schools where they can become familiar with the diseases which prevail in the sections of the country where they expect to practice.

THE COLLEGE INFIRMARY.

The Faculty have equipped on the fourth floor of the College building an infirmary, supplied with about twenty-five beds, reached by an elevator, with nurses' room and kitchen adjoining This infirmary enables the clinical teacher to do capital operations before the class, and at once the patient is received in the ward for after treatment and subsequent observation of the case by the class. In other words, the advantages of a hospital course are added to the clinical exhibition. Major operations in surgery and gynecology, in acute and chronic cases, are performed before the class and the patient treated afterward under the direction of students appointed to the duty.

In a word, this College will afford its students all the advantages of the most advanced methods of instruction, which can only be done with the aid of ample laboratories and clinical facilities; at the same time providing for the comfort and health of students in a building constructed in accordance with modern sanitary laws.

THE LOUISVILLE CITY HOSPITAL.

This hospital, with five hundred beds, is immediately opposite the College, and affords, on this account, peculiar advantages to the students of the institution. The hospital has just been remodeled and greatly enlarged, allowing very greatly increased advantages for clinical teaching.

The students of this institution possess equal advantages in all hospitals of this city with those from other medical colleges.

The four resident physicians of this hospital are annually selected from the recent graduates in this city, one being appointed from each of the four schools.

PRIZES OFFERED FOR THE SESSION OF 1895.

For general proficiency in all branches taught in the College: First Honor: Resident Interne in the City Hospital for one year. Second Honor: Curator's Gold Medal. Third

Honor: Faculty Gold Medal. Fourth Honor: Chief of the Polyclinic at the College and Physician to the out-door department of the College clinic for one year.

And two scholarships for the ensuing session, to the best first-course students.

ROLL OF HONOR.

To encourage diligence in study and reward the meritorious, the Faculty has established the Roll of Honor, open to any candidate for graduation who will undergo written examinations and attain a standard of ninety per cent in all the branches of the curriculum. The diplomas will be marked DISTINGUISHED, and the names will be so published in the list of the Alumni of the College.

REQUIREMENTS FOR ADMISSION.

Matriculates who do not furnish evidence of sufficient preliminary education are required to pass an examination in English and Elementary Physics, or Natural Philosophy, and in the equivalent of one year's Latin. Students who have not already studied Latin may enter and take Latin as a regular study during their Freshman year.

Graduates of literary or scientific colleges, academies or high schools, or who have passed the entrance examination to a literary college in good repute; who have a county or State teacher's certificate; graduates in medicine; previous matriculates of this College; and students who desire to pursue a special course of study—other than for the purpose of securing the degree—will be exempt from this examination.

Students who have completed a full course of study equivalent to that required for admission to this College may be admitted on the certificate of their instructors.

Gentlemen are advised before coming to the College to secure the documentary evidence of their preliminary education and of their good moral standing.

It is important to notice that the diplomas of such schools as do not require an examination preliminary to entrance are not accepted as evidence of qualification to practice in Illinois, Missouri, West Virginia, Texas, Alabama, Iowa and other States, including all the Northwestern States.

REQUIREMENTS FOR GRADUATION.

1. Applicants for admission to lectures must be of good moral standing and have a good English education.

2. The candidate for the degree of Doctor of Medicine must have attained the age of twenty-one years and have sustained a good moral character.

3. He must file satisfactory evidence of having studied medicine for at least four years under a *regular* graduate or licentiate and practitioner of medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession. No candidate shall be eligible for final examination for graduation unless his term of four years' study shall have been completed, or shall expire not later than three months after the close of the final examinations.

4. *He must have attended three complete courses of lectures in separate years*, the last of which shall have been in this institution; have taken the ticket of the Demonstrator of Anatomy two sessions, and have attended two courses of clinical and hospital instruction.

5. Students who have read the requisite time, and attended two full courses of lectures in a recognized medical school, are admitted to examination in this school after attendance upon one complete course.

6. The candidate must exhibit proof of compliance with the above rules, and have paid in full all College dues before he can be admitted to final examination. The fee for final examination must be paid to the Dean on or before the first day of May. The presentation of a thesis is not required.

The examination for the degree is on all the branches taught

n the College. The final examination on Anatomy, Physiology, Materia Medica and Chemistry takes place at the end of the Junior year.

Third year students who have passed these branches in other schools are exempt from the Junior examination.

REDUCTION OF FEES.

1. The established fees for the exercises of the regular session, except the matriculation fee, graduation fee, fee for dissection and laboratory fees, will be reduced one-half to graduates of less than three years' standing of other colleges.

2. The same fees will be remitted altogether to Alumni of this College.

TEXT-BOOKS RECOMMENDED.

Text-Books.	Books of Reference.
ANATOMY—Gray.	Morris, Weisse, Holden.
HISTOLOGY—Miller.	Delafield and Prudden.
PHYSIOLOGY—Kirke.	Yeo, Landois and Sterling.
MATERIA MEDICA—Biddle.	Potter, Shoemaker, U. S. Dispensatory.
THERAPEUTICS—H. C. Wood.	Brunton, Hare.
CHEMISTRY—Simon.	Attfield, Roscoe and Schorlemmer.
UROLOGY—Tyson.	
TOXICOLOGY.	Blythe, Reese.
MEDICINE—Osler.	Strumpel, Whittaker, Pepper.
DISEASES OF THE STOMACH—Ewald.	
PHYSICAL DIAGNOSIS—Loomis.	
PATHOLOGY—Ziegler.	Billroth.
BACTERIOLOGY—Frankel.	Crookshank.
DISEASES OF THE SKIN.	Crocker.
DISEASES OF THE RECTUM.	Mathews.
OPERATIVE SURGERY.	Jacobson, Bryant, Trevis.
SURGERY—American Text-book of Surgery.	Senn, Wyeth, Moullin.
OBSTETRICS—Lusk.	Parvin, Winckel, King's and Davis' Manual of Practical Obstetrics.
DISEASES OF WOMEN—Garrigues.	American Text-book of Gynecology.
	Greig-Smith on Abdominal Surgery.

DISEASES OF CHILDREN—J. Lewis Smith.	Keating's Encyclopedia, Starr's Goodhardt, Starr's Diseases of Digestive Organs in Children, E. Smith; Wasting Diseases of Children, W. H. Day; 3d year, Archives of Pediatrics.
OPHTHALMOLOGY—Norris and Oliver.	Donders, Landolt, Fuchs, Noyes.
OTOLOGY—Burnett.	Roosa, Sajous.
LARYNGOLOGY—McKenzie.	
RHINOLOGY—Cohen.	Burnett's System.
HYGIENE—Rhoe.	Parkes.
MEDICAL JURISPRUDENCE—Taylor.	Tidy.
DICTIONARY.	Duane, Dunglison.

ALUMNI ASSOCIATION.

Membership in the Alumni Association of the Medical or Dental Departments entitles one to become a member of the Alumni Association of the Central University, which owns and controls the institution.

Annual reunions are held at the close of each session, when reports are heard from the class secretaries, and the officers elected for the ensuing year.

The present officers are:

Dr. P. Richard Taylor . . *President* . . . . . Louisville, Ky.
Dr. Philip G. Barbour . . *Vice-President* . . . . . Louisville, Ky.
Dr. Ben A. Garr . . . . . *Sec. and Treas.* . . . . . Louisville, Ky.

CLASS SECRETARIES.

Dr. T. A. Hays . . . *Secretary Class* 1875 . Fairmount, Jeff'n Co. Ky.
Dr. P. P. Truehart . *Secretary Class* 1876 . Sterling, Ky.
Dr. Ben A. Garr . . *Secretary Class* 1877 . Louisville, Ky.
Dr. B. A. Allen . . *Secretary Class* 1878 . Louisville, Ky.
Dr. John G. Cecil . *Secretary Class* 1879 . Louisville, Ky.
Dr. S. Pickering . . *Secretary Class* 1880 . La Fountaine, Ind.
Dr. John Izard . . . *Secretary Class* 1881 . Pocahontas, Va.
Dr. Geo. W. Fisher. *Secretary Class* 1882 . De Land, Fla.
Dr. S. G. Dabney . *Secretary Class* 1883 . Louisville, Ky.
*Dr. Henry Huecker *Secretary Class* 1884 . Louisville, Ky.
Dr. John M. Feland, *Secretary Class* 1885 . Reynoldsville, Ky.

Dr. A. W. Terrell . *Secretary Class* 1886 . Burton's Creek, Va.
Dr. T. H. Maxedon, *Secretary Class* 1887 . Heathsville, Ill.
Dr. J. H. Miller . . *Secretary Class* 1888 . Bruce, Ky.
Dr. Will O. Porter . *Secretary Class* 1889 . Morton, Miss.
Dr. W. P. Coan . . *Secretary Class* 1890 . Moore, S. C
*Dr. S. D. Hopkins . *Secretary Class* 1891 . Rusk, Tex.
J. Alex. Mahaffey . *Secretary Class* '92-'93, Pendleton, Ky.
Dr. W. H. Graham . *Secretary Class* 1895 . Louisiana.

*Deceased.

Arrangements have been made for the accommodation of students in the immediate vicinity of the College. Students are urged to notify the Dean of the date of their expected arrival, that suitable homes may be secured for them.

This institution is located in the most delightful and healthful part of the city, surrounded by as elegant homes as are to be found in Kentucky.

Prices range from $14 to $20 per month.

For further information, address

P. RICHARD TAYLOR, M. D., *Dean*,
Hospital College, No. 324 E. Chestnut Street, Louisville, Ky., or Residence, 229 West Chestnut.

COLLEGE OF DENTISTRY

AT LOUISVILLE, KY.

Regular Session Begins Monday, January 2, 1895, and Continues Six Months.

The Board of Curators of the Central University of Kentucky, recognizing the superior advantages offered by the city of Louisville for the establishment and maintenance of a Dental College, has established a Dental Department in the buildings of the Hospital College of Medicine, and in doing so has spared neither expense nor pains to place the new department upon an equal plane with any other similar institution in the country.

THE NEW COLLEGE BUILDING.

The handsome and elegantly arranged new building is fitted out with an equipment for the scientific teaching of dentistry surpassed by no institution in the country. Like institutions in other cities have been visited and their inside workings carefully noted, and all their modern appointments secured in this institution for the comfort and convenience of the student in his study. Every department of instruction is constructed so as to facilitate work and at the same time is so compact as to enable the student to pass from one department to another without traversing many flights of stairs and dark hallways. This building is located on Chestnut street, directly opposite the City Hospital, where students are allowed to attend operations in oral surgery by the College Faculty.

Situated on the south side of the street, and having the

windows facing the north, the Infirmary and Laboratory are free from the glaring sun, and at the same time receive ample and magnificent light for their work. Every part of the building is elegantly lighted and ventilated, so that however far away from the windows a student may be, the light will be sufficient for his work. The building is situated on a lot 60 feet wide by 190 feet deep, is three stories in height, and has a floor area of about 25,000 square feet, all of which is occupied by the various departments of learning.

The first floor has a central entrance way into the College for students and Faculty, and a side entrance for patients of the infirmary. This floor is occupied by the Faculty room, Library, Dean's room, Chemical and Pathological Laboratories, and Surgical operating room, and the clinical amphitheater in the rear.

The second floor in front is occupied by the infirmary, and is entered by patients through the reception room, in charge of the examiner of the infirmary. This infirmary has all the needs of the student handily arranged, and has attached to it, although entirely shut off, an extracting room and an impression room. Back of this is the large lecture hall, or amphitheater, which occupies, in part, the second and third floors. In the rear, on the second floor, is the dissecting room, entirely separated from the other parts of the building by thick walls, and conveniently arranged, with every precaution observed from a hygienic standpoint.

On the third floor front is the Dental Laboratory, large and spacious, and fitted with every appliance for all branches of Prosthetic Dentistry. Back of this is the amphitheater, so arranged as to allow students on remote seats to see and hear with comfort and ease. This is brilliantly lighted with windows and skylights, and every chair in the room is in a bright light.

The Faculty has been chosen with a view to the especial fitness of each man for the position he is to occupy, and embraces men capable as teachers and eminent in the profession.

The Dental Department, being directly connected with the Medical Department, affords to the dental student rare opportunities to combine a medical and dental education. In the present advanced state of the profession of dentistry, and the higher qualification exacted of its members, a knowledge of general medicine makes the acquirement of the degree of Doctor of Medicine almost essential to the success of those who would practice the now well-recognized specialty of dentistry.

The curricula of the two departments are so arranged that the graduate of one may acquire the degree of the other by taking one additional course of instruction in that department. The student desiring to take advantage of this offer must notify the Dean at the beginning of the second term.

The City Hospital, the largest institution for the care of the sick in the city, is directly opposite the College. Its wards are at all times open to the students of this College, and frequent opportunities of witnessing surgical operations are enjoyed by the class, thus giving the dental student much valuable instruction.

The supply of clinical material can safely be relied upon, and each student will have ample opportunity for practice in every class of dental art.

The high standard of excellence which has long characterized the Hospital College of Medicine, and made that institution so justly famous, is maintained in the Department of Dentistry, which is a sufficient guarantee that the graduates of this school will be fully equipped to become eminent in their profession.

REQUIREMENTS FOR ADMISSION.

The College is a member of the National Association of Dental Faculties, and is governed by its rules.

The candidate must submit to a preliminary examination in those branches which go to make up a good English education.

Satisfactory proof of having graduated from a reputable

college, high school or literary institution, a diploma or a first grade teacher's certificate will exempt the candidate from such examination.

Before submitting to an examination, the candidate must pay to the Dean the matriculation and lecture fees in full. In case of rejection, money so paid will be refunded without delay.

The candidate must be prepared to submit to the Dean of the College satisfactory evidence of good moral character.

SESSIONS.

The next regular session of the Louisville College of Dentistry, Dental Department of the Central University of Kentucky, will begin January 2, 1896, and continue six months.

COURSE OF STUDY.

The course of study in this department will embrace all subjects directly pertaining to the science and art of dentistry, and such collateral branches as are required of first course medical students.

The plan of instruction is systematically graded to meet the requirements of the uniform standard established by the National Association of Dental Faculties.

REQUIREMENTS FOR GRADUATION.

To obtain the degree of Doctor of Dental Surgery, the candidate must have attained the age of twenty-one years; he must have attended three full courses of lectures, the last of which must have been at this College; he must pass a satisfactory examination in all the branches especially relating to dentistry; he must deposit in the museum of the College a creditable specimen of prosthesis.

GRADUATION IN MEDICINE.

Graduates in the Dental Department may obtain the degree of M. D. by attending two additional sessions and passing

satisfactory examination in the Medical Department of the University.

BOARD.

Board can be obtained near the College at from $3 to $5 a week, in the best families. Students are invited to call upon the Dean immediately upon their arrival, that he may be able to assist them in procuring comfortable homes.

INSTRUMENTS.

Each student will be required to furnish his own instruments, a list of which can be had by application to the Dean of the Faculty. An outfit can be had suitable for college use, adapted to after-practice, at from $30 to $75.

TEXT-BOOKS.

The student should be provided with at least one standard text-book on each subject taught. The following list meets the approval of the Faculty:

Text-Books.	Books of Reference.
ANATOMY—Gray.	Tomes' Dental Anatomy, Miller, Legros and Magitot Denta Folicle.
HISTOLOGY.	Black's Periosteum and Peridental Membrane.
PHYSIOLOGY—Kirke.	Yeo, Yandois and Sterling.
MATERIA MEDICA—Potter.	Bartholow, Biddle.
THERAPEUTICS—Gorgas.	H. C. Wood.
CHEMISTRY, METALLURGY } Mitchell.	Essig, Bloxam.
GENERAL DENTISTRY—Harris' Principles and Practice, or American System of Dentistry.	
PROSTHETIC DENTISTRY—Richardson's Mechanical Dentistry.	
OPERATIVE DENTISTRY—Taft.	
ORTHODONTIA.	Talbott's Irregularities, Guilford's Orthodontia.

Oral Surgery.	Garrettson, Kingsly, Heath.
Crown and Bridge Work.	Evans.
Surgery.	Gross.
Medical Jurisprudence.	Taylor, Tidy.
Hygiene.	Rohe, Parkes.
